VINDICATE YOURSELF, COVERNOR. With 400 corpses still hidden somewhere in the Johnstown ruins, Gov. Braven has directed that the State work in the removal of debris from the village streets shall cease. As custodian of the relief fund, which a sympathizing people offered to the sufferers, the Governor was endowed with a lofty trust. He seems to have fulfilled it in a fashion not to

The months since the disaster have been measured by red tape, and while hundreds of thousands of dollars of relief money lay idle in the hands of the slow-going Governor, the stricken people of Johnstown have been helped by Heaven and themselves. An effort is to be made to transfer the Revenue Marine Service from the control of the Treasury to the Navy Department. May be, then, the revenue cutters will come in for a snare of the general bracing up, and British tramp steamers won't be able to give them the laugh inside New York Harbor.

COUNTING-OUT RHYMES.

A Curious Collection of Verses Pamillar to the Nursery.

Chambers's Journal presents an interesting and instructive collection of children's count. Moro Candidates for "The Evening ing-out rhymes. According to that authority the best known is:

Onery, twoery, dickery, davy, Hallabone, crackabone, tenery, navy, Discum, dandum, merry come tipe. Humbledy, humbledy, twenty-nine, O-U-T, out!

Somewhere about one hundred different variations and versions of this rhyme alone

are given.
The following is one of several versions from Scotland (Aberdean):

Enery, twaery, tuckery, tayven,
Haisba, crackery, ten or einyven,
Pren, pan, muser dan,
Fredelath, factelam, twenty-one.
From a work on the gypodes by Mr. Charles G. Lehnd we have a specimen of a gypsy magic spell. It is as follows:

Etkeri, skirl, you kair-an. Filisin, rallisin, Nicholas ja'n, Kirl, kari, Irishman.

Stink, stani, buck.

This, on comparison, will be found to be almost identical with the first example we have given of a counting our rhyme, "ekket, skairi" being equivalent in Romany for "onery, twiery."

Another very pecunar form is that commencing "Fery meany " & The commencing " Fery meany " & The commencing " Early meany " & E mencing "Eeny, meeny," &c. This is a great favorite among American children, the commonest version being:

Feny, meany, miny mo, Catch a rigger by the toe, If he hollers let him go, Easy, meany, miny, mo.

This example gives evident proof of adap-tation to American idea, but the preliminary and concluding "Feny, meany " are of obvi-ous German or Dutch origin. Such as:

Free, tene, mone, mei, Pastor, lone, bene, strei, Ene, lune, berke, berke, Werr Weir Wor Was

Some of the transmogrifications of words some of the transmogrifications of words are very interesting. The "Fastor, lone" of the German rhyme given above we find in Cornwall as "Basea lora," while in America it is changed into "Pestalony," "Pisky larre," "Barrelona," "Pennsylvania," "Butter lather," "Turcalona," &c. One of the most amusing transitions is in connection with the rhyme:

One is all, two is all, sick is all zan, Bobtsii nampy-goat, tittle, tall, tan; Harum, searum, Virgin Mary, Singleum, sangleum, Johy, oh, buck. Here we have a very good illustration of the evolution theory of modern scientists. The first form of "bo'tail moneygost" changes to "bebtail billy-roat," "bobtail dominicker," "bobtail vinegar," and, at last, through course of time and altered con-ditions of existence, the despised "liebtid namy-goat" ultimately develops into the highly respectable form of "Baptist minister!" A carrous and exceedingly interesting example comes from Eugland, thus:

Am, tain, fethery, ip; Arte, sintur, debbery, dick; Aintic, taintic, fethertic, binmait; Ain bumpat, tain binmpit, gec-hitl And this last is Weish.

He did not wait to get away from St. Peter's for this purpose, but sat him down at once upon its steps, and allowed his wife and daughters to "do" the edifics while he lost timed in the absorbing delight of his home
